EDUCATION

·Diploma in Artificial Intelligence and Machine Learning
Government Tool Room and Training Centre, Magadi 2023-27

·SSLC
V T Raibagi English Medium High School 2023

PROJECTS

·School Management System
A high-end administrative Flutter app for managing school operations, finances, and real-time communications.

- Automated Financials: Developed a dual-tracking fee module with automated PDF receipt generation and transportation fee logs.
- Smart Communication: Implemented one-click WhatsApp redirection to seamlessly trigger direct absence alerts to parents' phone numbers.
- Technology Used: Flutter, Dart, Firebase, JWT.

·Official College Website
A responsive web platform designed for institutional use to centralize academic resources and campus operations.

- Engineered the official college website to provide a streamlined digital hub for the institution.
- Integrated dedicated portals and key features to optimize information access for both students and faculty members.
- Technology Used: HTML, CSS, JavaScript.

·RAG-Based Question Answering System
An intelligent retrieval-augmented generation (RAG) platform designed to extract and synthesize information from PDF and text docume

- Engineered a high-performance semantic search pipeline utilizing FAISS and Sentence Transformers for rapid and accurate document retrieval.
- Integrated the Mistral LLM via Ollama and FastAPI to generate precise, citation-backed answers complete with source context
- Technology Used: Python, FastAPI, FAISS, Ollama, Sentence Transformers.

EXPERIENCE

·Freelance Software Developer *Mar 2026 - Apr 2026*
Independent Client Remote

- Managed the end-to-end development and delivery of a premium School Management Application tailored to client specifications.
- Collaborated directly with the client to gather requirements, iterate on feedback, and ensure the final product aligned with their daily operational goals.
- Designed and implemented a comprehensive financial tracking module and a smart attendance system utilizing Flutter, Dart, Firebase, and JWT.
- Strengthened full-stack development skills by collaborating within a team, utilizing version control to seamlessly integrate frontend UI designs with backend database systems.

TECHNICAL SKILLS AND INTERESTS

Programming Languages & Technologies: Python, Dart, Flutter Framework, Fast API, MySQL, MongoDB, Git & GitHub, Firebase, Arduino.
Areas of Interest: AIML, Application Development
Soft Skills: Problem Solving, Self-learning, Adaptability
